PROFESSIONAL SUMMARY

Backend Engineer with **3+ years** (Aug 2023 – Present) at BNY Mellon across **Contract Platform (Java 17, Spring Boot, Angular)** and **Regulatory Platform (ASP.NET, IIS, monolithic)**. Delivered **36% faster contract processing, 99% faster page loads (7 min -> 5 sec, 18.8 MB)**, **4,000+ vulns remediated**, DR for **25+ apps**, Kafka multi-cluster resiliency, and Windows 2016->2022 zero-downtime migrations. RBAC, F5/Cumulus, SiteMinder, and **AI-assisted development (Windsurf, Devin)** with governance.

TECHNICAL SKILLS

- Languages:** Java (8, 17), Python, C++, SQL
- Backend:** Spring Boot, Spring MVC, Spring Data JPA/Hibernate, RESTful APIs, Microservices, Apache Kafka, ASP.NET (legacy), API Gateway, API Manager (throttling, rate limiting, sandbox URLs)
- Data & Platform:** MySQL, PostgreSQL, Redis, Vertica, DB2, Docker, Jenkins, Git, GitLab CI/CD, Maven, JFrog Artifactory, Ansible (Regulatory Platform), Google App Engine (Contract Platform), F5 BIG-IP, Cumulus, IIS, Windows Server 2016/2022, Informatica (platform ETL)
- Quality & Observability:** JUnit, Mockito, Selenium, Gherkin, Cucumber, SonarQube, Grafana, Splunk, Orion, PVT, Jira, Confluence, MCP (Model Context Protocol)
- Security & AI:** RBAC/Entitlements (Approver/View/Add), SiteMinder, CyberArk PAM, Active Directory, VMAD - Vulnerability Management, Secret Scanning, Windsurf, Devin, RAG, Prompt Engineering

EXPERIENCE

Bank of New York Mellon

Chennai, India

Software Engineer (Backend)

Aug 2023 – Present

- Microservices & Contract Platform (Contract Platform):** Own Spring Boot services for contract maintenance/reconciliation with **@Async/@Transactional**; secure REST/Kafka via **API Gateway / API Manager**; deploy via **Google App Engine**, Docker, Jenkins, GitLab CI/CD.
- Performance – Dual-Track: Contract Platform:** 36% faster uploads via parallelization/batching/tx tuning + URI migration ***.bnymellon.* -> *.bny.*** zero downtime. **Regulatory Platform:** 18.8 MB page 7 min -> 1 min (IIS compression via RDP) -> **5 sec (99%)** via app-wide server-side pagination.
- Reliability & Infrastructure:** DR for **25+ apps** multi-cluster enabling automated failover and consistent runbooks; validated **Kafka backup failover (8 topics, 2 clusters, earliest/latest offsets, lag)** pre-prod and orchestrated URI migration ***.bnymellon.* -> *.bny.*** across APIs/F5. Migrated **Windows 2016->2022 (QA 3->2, PROD 3->3)** for Regulatory Platform (DB2/Informatica ETL at platform level) via Ansible, **F5/Cumulus** isolated Chrome validation, **Grafana/Splunk/Orion/PVT**, zero downtime, and migrated 30+ business-critical reports preserving entitlements.
- Security & Entitlements:** Remediated **4,000+ findings in 3 years (Regulatory: 28 – 5 Critical, 8 High)** hardening login/auth (SonarQube, VMAD - Vulnerability Management); implemented **RBAC** (Approver/View/Add) enforcing least-privilege. I manage entitlements for my team – create/map level-based access (Access Hub for prod, direct provisioning for lower envs). Reviewed **Devin Chain-of-Thought secret-exposure** (chat/GitLab commits/pipelines), rotated secrets, authored preventive guidelines.
- Quality, Incident Response & AI Tooling:** **NextGen 300+ / 95%** -> fully automated regression (auto-gen cases/reports -> Jira via MCP). Fixed **P1 MIME outage** (Edge/Chrome strict **text/html** wrapping **.axd/.css/.js** in **web.config** -> removed with SiteMinder) + regulatory report pre-deadline. BAU/L2/L3, RFCs/runbooks. Daily **Windsurf/Devin** for code-gen/refactoring/debugging/docs (AI Pioneer L3: RAG/Agent/Nuggets).

SELECTED PROJECTS

- High-throughput Contract Processing Service** *Mar 2025* – Contract Platform: Refactored critical workflows (**@Async/@Transactional**, idempotency, validation) -> 36% reduction; expanded JUnit/Mockito/API coverage.
- Credit Card Fraud Detection** *Sep 2020* – github.com/sarques/credit-card-fraud-detection (16 stars/16 forks): Python/Flask REST APIs, rate limiting, caching, query optimization; Docker on Heroku with logging/monitoring.

EDUCATION

- NIT Warangal** – M.Tech Computer Science, CGPA 7.13 *Sep 2021 – Jun 2023*
- MBM Jodhpur** – B.E. Computer Science, CGPA 7.48 *Aug 2016 – Oct 2020*

PUBLICATION

- Autoencoder-Huffman Ensemble Model for Image Compression** – Springer, Dec 2024 – [Link]: Two-stage autoencoder-Huffman, **5.5x–24.2x** on MNIST/CIFAR-10/Fashion MNIST with minimal loss.

HONORS & AWARDS

- GATE 2021:** Secured **99.1 percentile (AIR 943)** in Graduate Aptitude Test in Engineering (Computer Science)
- Kaggle SIIM-ISIC Melanoma Classification:** Ranked in **top 19% globally** in large-scale medical imaging competition

CERTIFICATIONS

- AI Pioneer – Proficiency Level 3:** BNY Internal AI Learning Program – RAG, Agent Design, Prompt Engineering, Nuggets, Workflow Orchestration, AI Governance
- Machine Learning** – Coursera
- Deep Learning Specialization** – Coursera
- Introduction to Data Science in Python** – Coursera
- Statistical Thinking in Python (Part 1)** – DataCamp
- Mathematics for Machine Learning** – Coursera
